

# Designer Pebblestone 2007

## NIFL Resin Flooring Install Altroflow to a Luxury Housing Renovation

**NIFL Resin Flooring was asked to provide a completely unique flooring solution for a luxury residential refurbishment. NIFL specified Altro Pebblestone in a further step into Designer Flooring for the family company.**

NIFL Resin Flooring installed 65m<sup>2</sup> of Altro Pebblestone, manufactured by Altro Resins, to the luxury residential project in Yorkshire to provide an exclusive designer resin floor finish.

Altro Pebblestone is a blend of natural and synthetic aggregates, bound with an epoxy resin to provide a highly decorative and highly durable flooring solution. NIFL decided upon Pebblestone after taking a significant number of considerations into account, including aesthetic appearance, durability, lead time and budget.

The owner of the property said 'NIFL came up with a water tight proposal and an even more impressive installation. I'd recommend NIFL Resin Flooring to anybody who is looking for a Designer Resin Flooring installation.'
